

Research-based. Data Driven. Effective.

What is Skills®?

Skills® is a web-based program for creating and implementing individualized teaching plans for children with autism spectrum disorder (ASD). This one-stop resource — encompassing everything from assessment to lessons to progress tracking — empowers school districts to apply comprehensive, customizable plans to a diverse group of students with a wide range of special needs.

aligned with the

In one easy-to-use online program, Skills® improves learning outcomes, maximizes budgets, and provides measurable evidence for proper placement and continued funding.

With the evidence-based Skills® approach, school districts can:

Improve learning outcomes

- Nearly 4,000 evidence-based lessons across a range of eight unique learning areas
- Multi-disciplinary collaboration for more cohesive plans
- Tools for overcoming challenging behavior, leading to better testing scores

Increase efficiency

- IEP goals and benchmarks included with each lesson to save teachers time
- A single platform for multiple students, so teachers can stay organized

Maximize funding

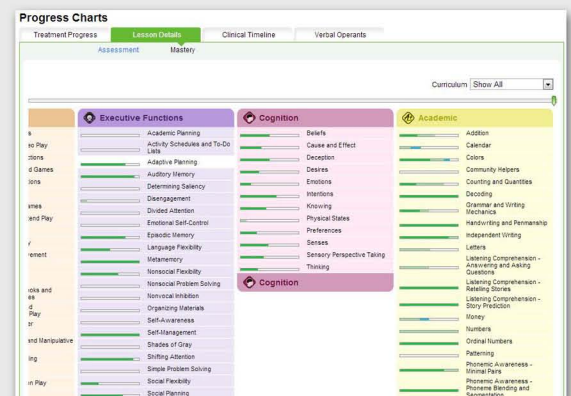

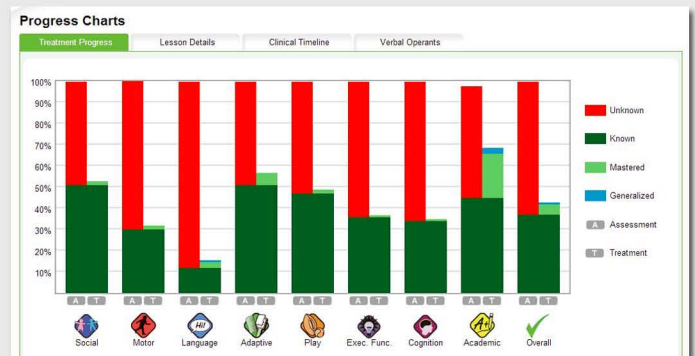

- Customizable teaching plans and activities for a range of students with varying special education needs
- Plans that advance with each child every year, eliminating the need for additional programs

Measure progress

- Instantly available data-driven reports and charts for progress tracking, compliance and funding allocation

Ensure compliance

- Research-based curricula aligned with the Common Core State Standards
- Assessment results linked directly to tailored lesson plans, facilitating proper class placement

1 in every 68 children in America is diagnosed with autism, making it more prevalent than juvenile diabetes, pediatric cancer, and pediatric AIDS combined.

Where did Skills® come from?

The Skills® story can be traced back more than three decades, when Dr. Doreen Granpeesheh studied at UCLA for 12 years under renowned autism research scientist Dr. Ivar Lovaas. Building on Dr. Lovaas's findings, Dr. Doreen established the Center for Autism and Related Disorders (CARD) in 1990. Two decades later, CARD researchers created Skills®, integrating more than 30 years of scientific study with the latest online technology.

Effective. Evidence-based. Safe. Easy to use.

The Skills® BIP Builder is the ultimate tool for efficiently designing effective Behavior Intervention Plans for challenging behavior. Proven and safe, the Skills® BIP Builder emphasizes the use of evidence-based practices and least-intrusive procedures.

With the Skills® BIP Builder, schools see improvements in learning outcomes by addressing problem behaviors in the classroom.
