

# POTS-Over-LTE Kit

Our **POTS-over-LTE Kit** makes it easy to upgrade your system by converting dated analog lines with advanced LTE technology. By switching to a secure, reliable LTE solution you can reduce expenses and gain better visibility and management of your systems.

## With our POTS-over-LTE Kit you can:

**REDUCE EXPENSES:** LTE technology is more affordable than traditional analog service, meaning you'll save money on both upfront costs and ongoing maintenance expenses.

**QUICKLY LAUNCH:** Our solution can be deployed with little to no infrastructure updates in under a few hours. We will also perform an initial site survey so you know what to expect during launch.

**GAIN VISIBILITY AND MANAGEMENT OF YOUR CONNECTED LINES:** Our cloud-based portal allows you to monitor and manage your system remotely. Ensure your lines are always connected by setting up notifications to alert you of any issues.

**FUTURE-PROOF YOUR FACILITIES:** By switching to LTE you will be better equipped to manage, monitor, and scale your connected systems while increasing your uptime (and reducing your liability).

## WHAT USES A POTS LINE?

- Voice Lines
- Elevator Phones
- Emergency Call Boxes
- Panic Buttons
- Alarm Systems
- Gates & Doors
- Credit Card Machines
- Meter Readings
- Fax Lines
