

THE ORGANWISE GUYS®

Kids in The OrganWise Guys program have statistically significant improvements in:

For over 25 years, [The OrganWise Guys Inc.](#) has worked with schools, early learning centers, universities, foundations, public and private health organizations, nutrition experts and educators across the country to create a “whole child” approach to the prevention of childhood obesity.

The OrganWise Guys program is a curriculum-linked, evidence-based approach to nutrition and physical activity that provides a solution for educators and parents who want to inspire their children, and the lives of children they influence, to embrace a holistic, health-focused, balanced life since a healthy child is a better, more productive student.

[Research](#) shows that the behaviors that lead to improved health also lead to improved academic outcomes in literacy and math. These materials (available in physical items, manipulatives and digitally) help children learn about nutrition and health in creative ways that allows them to retain important information to take care of their overall well-being. Best of all, it's **FUN!**

Please click below to schedule an overview of the program and to discuss how this might fit into your programming!
