

2026 Is Not Business as Usual.

- ✓ Energy volatility.
- ✓ Tighter compliance rules.
- ✓ Competitive funding cycles.

If your facility plan still looks like last year's... it may already be outdated.

Quick Check:

Are you...

- Waiting for grants before defining your upgrade scope?
- Unsure if your projects meet BAA / BABA requirements?
- Delaying upgrades because staffing is stretched thin?
- Concerned about pulling funds away from core programs?

If you checked even one, you're not alone.

Did You Know?

Federal energy funding is actively moving in 2026, and tracking opportunities early can make a major difference for your facility plans.

A new 2026 Federal Grants Calendar highlights more than 40 top funding opportunities from major U.S. agencies supporting infrastructure, energy efficiency, sustainability, community development, and more, giving organizations a strategic edge when planning upgrades and applications.

What Smart Organizations are Doing Differently

Instead of reacting... they are:

- 1 Starting with no-cost energy pre-assessments
- 2 Aligning projects with funding before deadlines open
- 3 Simplifying upgrades under one coordinated partner
- 4 Prioritizing high-impact areas first

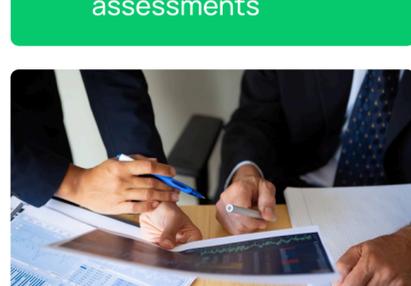

IKIO Supports Education, Government & Non-Profit Facilities with:

✓ Energy & facility assessments

✓ Savings identification & project planning

✓ Funding & compliance alignment

✓ Turnkey lighting modernization

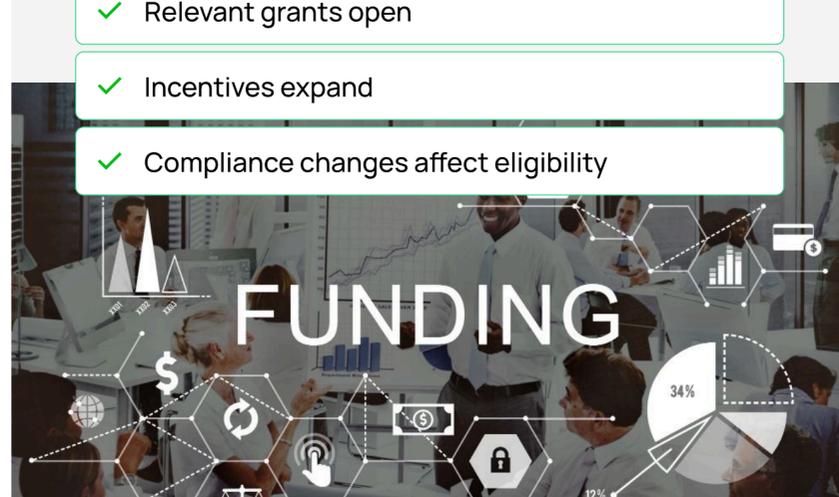

This reinforces capability without sounding like a catalog.

Stay Ahead of Funding Windows.

Funding cycles move fast, and often without long notice.

Organizations working with IKIO receive updates when:

- ✓ Relevant grants open
- ✓ Incentives expand
- ✓ Compliance changes affect eligibility
